

# EVANTEK AUTOMATION

Evantek Automation is a leading provider of industrial automation, HVAC automation, building management systems, environmental monitoring, and industrial instrumentation solutions. The company delivers intelligent, energy-efficient, and customized automation systems for industrial, pharmaceutical, commercial, and infrastructure sectors.

## Company Overview

Evantek Automation specializes in smart industrial automation technologies and advanced monitoring systems designed to improve operational efficiency, process control, energy management, and environmental safety. The company provides turnkey automation solutions including SCADA systems, PLC automation, HVAC controls, BMS systems, EMS systems, clean room monitoring, gas monitoring systems, and industrial instrumentation products.

## Vision & Mission

**Vision:** To become a trusted leader in industrial automation and intelligent monitoring solutions.

**Mission:** Deliver innovative, reliable, and energy-efficient automation systems that improve productivity, safety, and operational performance for clients across industries.

## Core Services

Service Category	Description
Building Management System (BMS)	Centralized monitoring and control of HVAC and building systems.
Energy Monitoring System (EMS)	Advanced energy analytics and power monitoring solutions.
SCADA & PLC Automation	Industrial process automation and intelligent control systems.
HVAC Automation	Automation systems for AHU, clean rooms, and HVAC operations.
Environmental Monitoring	Continuous monitoring solutions for pharma and industrial facilities.
Industrial Instrumentation	Pressure, temperature, flow, and RH monitoring instruments.
Gas Monitoring Solutions	Emission monitoring, oxygen analyzers, and gas detection systems.

# Complete Product Portfolio

Product	Overview
SCADA Systems	Real-time monitoring and control platform for industrial operations.
Clean Room Monitoring System	Pharma-grade environmental monitoring solution.
Door Interlocking System	Safety and contamination control solution.
Standalone AHU Panels	Smart control panels with integrated monitoring.
BMS System	Centralized building management solution for HVAC automation.
EMS Solution	Energy optimization and electrical monitoring system.
Digital DP Gauges	Differential pressure monitoring instruments.
Flow Transmitters	Industrial-grade flow measurement devices.
Pressure Sensors	High-accuracy industrial pressure sensing solutions.
Temperature Sensors	RTD and thermocouple-based monitoring systems.
RH Transmitters	Humidity monitoring and environmental control systems.
DP Transmitters	Differential pressure transmitters for clean room monitoring.
Dust Monitoring System	Industrial emission and dust analysis solution.
Oxygen Analyzer	High-precision oxygen monitoring system.
CEMS System	Continuous emission monitoring solution for industrial plants.
Industrial Automation Panels	Customized automation panels for industrial applications.

## Industries Served

- Pharmaceutical Industries
- Manufacturing Plants
- Commercial Buildings
- Infrastructure Projects
- HVAC Contractors
- Clean Room Facilities
- Engineering & Automation Projects
- Industrial Production Units

## Why Choose Evantek

- Customized Automation Solutions
  - Energy Efficient Technologies
  - Reliable Industrial Products
  - Advanced Monitoring Systems
  - Experienced Technical Team
  - Smart Integration & Support
  - Industrial Safety Compliance
  - Modern Automation Infrastructure
- 

*Prepared as a professional company profile presentation for business and client communication.*
